## About This Game

"A cult of madmen has brought the black flower from the realms of demons to our world. As a warrior of the sacred order you shall fight your way through hordes of the possessed cultists and demons to destroy the flower before it blooms..."

**BLOOM** is a fast paced frenetic action first person shooter indie game inspired by the classics like Doom, Quake, Blood, Heretic, Hexen, Duke Nukem and the rest of the '90s FPS giants. Simplistic, no-nonsense, shoot everything that moves. Two episodes with tons of actions, dozens of monsters, over a dozen of weapons, secrets and everything you'd expect from a retro shooter game.

**Two-handed sword, electric crossbow, pistols, sub machine guns, pump shotgun, double barreled shotgun, rifle, laser, minigun, plasma gun, grenade launcher, bazooka, ray gun, chain lightning gun** plus a few secret weapons will be your tools of dealing with **demon summoners** in dark forests, toxic caves, concrete tunnels, castles, demon realms, spilling rivers of pixelated blood to psychedelic metal tunes!
